HUNTER TECHNOLOGY CORP

PRESS RELEASE

Hunter Technology Announces Acquisition of Spinnaker Microwave *Acquisition Creates one of the EMS Industry's Strongest RF Solutions Providers.*

Santa Clara, CA September 9, 2011: Hunter Technology and Spinnaker Microwave have announced the signing of a definitive merger agreement today whereby Hunter has agreed to acquire all of Spinnaker's outstanding shares. Spinnaker is based in Santa Clara, California and is a leading provider of RF and Microwave solutions including signal source components and integrated sub-assemblies used in defense, scientific and test and measurement applications. Upon completion of the acquisition, Spinnaker will become a wholly owned subsidiary of Hunter Technology, a California based corporation and provider of electronic manufacturing services to industry leaders in the defense, aerospace, test and measurement, and medical markets. The transaction has been unanimously approved by the board of directors of each company. Terms of the deal were not disclosed.

"Acquiring Spinnaker is a major step in Hunter's endeavor to become the preeminent supplier of highly reliable engineering and manufacturing solutions. The addition of RF/Microwave engineering products and development capabilities further extends Hunter's reach into the front-end of the product development cycle. Spinnaker's enhanced test expertise also extends our back-end capabilities as we accelerate our maturation into high-level assemblies and systems enabling us to bring significantly more value to our Customers," said Joseph F. O'Neil, Chairman, President and CEO of Hunter

"We are excited about joining the Hunter team and the new business and technology opportunities that we can jointly pursue." said Jason Seifert, Chief Executive Officer of Spinnaker Microwave. "Joining Hunter puts us in a great position to accelerate the expansion of our current product lines, while continuing to deliver the excellent levels of service and support our customers have come to expect. In addition, we are confident that Hunter's current customers will benefit from our combined, broader technology portfolio and the manufacturing capabilities."

About Hunter Technology:

Headquartered in Santa Clara, CA, Hunter Technology is a leading Electronics Manufacturing Services (EMS) provider focused on delivering specialized design, engineering and manufacturing services to defense, aerospace, industrial, and medical OEMs. Hunter Technology helps clients design, engineer, build, test, and ship reliable, mission-critical electronics products. Design and engineering solutions that are combined with vertical integration help to optimize our clients' operations by lowering costs and reducing time-to-market.
